

Controversies: Toray Industries

- In November of 2017, it was revealed that a Toray Industries subsidiary (Toray Hybrid Cord, Inc) had been falsifying the data of its product tests for eight years (reinforcement material for tyres, etc.). The company [manipulated 149 numbers against 13 client companies](#). Toray Industries [made the matter public](#) after an internet leak.
- According to the company's [CSR report for 2018](#), there was one incident of chemical liquids leaking out of its factory into the environment, polluting the water. Toray Industries states that it caused miniscule environmental damage.
