Controversies: Linde

- In August 2021, the US EPA announced a $127,000 USD settlement with Linde-Praxair for violations of chemicals release prevention and reporting requirements at its CO2 plant in Carson, California. Praxair had failed to notify authorities of a 2019 ammonia leak.

- In April 2021, an explosion at Linde-White Martins' industrial oxygen packing plant in Fortaleza, Brazil left four workers injured.

- In February 2018, the US Pipeline and Hazardous Materials Safety Administration levied a penalty of close to 45,000 USD for violations of pipeline safety regulations at a Linde facility located in Green River, Wyoming.

- In September 2016, the US EPA levied a penalty of almost 95,000 USD on the Linde Gas North America plant at Romeoville, Illinois for a violation of ambient air quality standards.

- Between 2012 and 2021, Linde paid more than 1,5 million of USD in fines for 14 environmental violations, according to the violation tracker project of Good Jobs First.
